

Dreambox Students,

You are invited to take part in a Summer Dreambox Challenge!

It's really easy and will be a fun way to keep your math skills sharp. Complete 30 lessons over the summer and receive an extra recess in September. You can complete the lessons in any way that works for you and your family. Some of you may prefer using the program once or twice per week and others may find it better to work in chunks of time. Of course, this will depend on what else you will have planned over the summer.

You can access Dreambox in a variety of ways.

- **On the Region 18 home page, begin with the student log on, then go to math resources or Mrs. Pasiuk's Math Corner website.**
- **On the Region 18 home page, type Pasiuk into the search bar, then go to Mrs. Pasiuk's Math Corner website.**
- **On the Region 18 home page, log on through parent/parent resources/math resources.**
- **Through CLEVER.**

The program can be used on a computer or on an iPad. Below is the iPad code for each school.

- **Mile Creek – v6us/milecs**
- **Lyme School – v6us/lymecs**

The Phoebe Noyes library has computers and Ipads that you can use if you do not have access to them at home. Dreambox will keep track of your lessons over the summer. Just let me know you want to participate. It's that simple. Send me an email or drop a note in my mailbox before the last day of school.

Thanks, Mrs. Pasiuk pasiukk@region18.org
